

M e m o r a n d u m

Date: January 8, 2010

To: Fleet Operations Section - Torrance

Attention: Captain W. A. Peters

From: **DEPARTMENT OF CALIFORNIA HIGHWAY PATROL**
Office of the Assistant Commissioner, Inspector General

File No.: 005.9968.016163.010

Subject: 2009 COMMAND PROPERTY INSPECTION REPORT

State Administrative Manual (SAM) Section 8652 requires Departments to conduct a physical count of all state owned property and reconcile the count with accounting records at least once every three years. Departmental records indicate the last command inventory by the Fleet Operations Section - Torrance was conducted on March 2, 2009. In order to provide independent verification and reasonable assurance to the Office of the Commissioner that California Highway Patrol inventory records are complete and accurate, your command was selected for a property inspection.

In accordance with procedures outlined in Highway Patrol Manual (HPM) 11.2, Materials Management Manual, and HPM 22.1, Command Inspections Program Manual, an inspection of your command's property, was completed by the Property Inspector (PI) on November 16, 2009. Using property records from the appropriate Offices of Primary Interest (OPI), the PI selected a random statistically-valid sample of property that was stratified across two property areas: general inventory control and telecommunications, (see Attachments B and C). Additionally, the PI chose items within your command and compared them to the appropriate inventory records.

According to the OPI inventory lists, the command had a total property inventory population of 233 items (a). The statistically-valid sample at a 95 percent confidence level \pm 5 percent error rate provided a total stratified sample size of 50 items when rounded up to the next whole number (d).

Safety, Service, and Security

	Population Size	Percentage of Total	Calculated Sample Size	Predetermined List Sample Size
	(a)	(b)	(c)	(d)
ICU Decals	60	25.75%	12.62	13
Telecommunications	173	74.25%	36.38	37
Fleet	0	0.00%	0.00	0
Weapons	0	0.00%	0.00	0
Total	233			50

When comparing equipment recorded on the predetermined property inspection list to equipment located at the command, 8 of the 50 items were located. Thirty-nine items were transferred out of the command, and three times were unable to be located. The property inspection results of the equipment recorded on the predetermined property inventory list to equipment located at the command are summarized in Attachment A.

When comparing equipment assigned to the command to the OPI inventory lists, 17 of the 17 items reconciled. One item located was not listed on the command's inventory and requires a correction to the property record. The property inspection results of equipment located at the command to the OPI inventory list are summarized in Attachment A.

I request your command research and investigate all discrepancies in accordance with departmental procedures outlined in HPM 11.2, Materials Management Manual, Chapter 8, Equipment, and work with the appropriate OPI(s) to rectify any variances. A Physical Inventory Adjustment Request, CHP 24, must be completed to adjust the inventory records. In order to verify that the above listed discrepancies have been rectified, please submit a memorandum to the Office of Inspections through your respective Division by April 8, 2010.

Furthermore, in accordance with the Governor's Executive Order S-20-09 to increase government transparency, this report will be posted on the CHP's internet website, and on the Office of the Governor's webpage, located on the State's Government website.

Fleet Operations Section - Torrance

Page 3

January 8, 2010

The Office of Inspections would like to thank your command for their assistance during this property inspection. If you have any questions or need additional information, please contact me or Roger Ikemoto, Senior Management Auditor at (916) 843-3160.

M. C. A. SANTIAGO, CIG
Assistant Commissioner

Abstract. The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and blood pressure (BP) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 12-week training program consisting of three sessions per week, each lasting 30 minutes. The control group did not exercise. The HR and BP were measured at the beginning and end of the 12-week period. The results showed that the exercise group had a significant decrease in both HR and BP compared to the control group. The HR of the exercise group decreased from 72 to 68 beats per minute, while the BP decreased from 120/80 to 110/70 mmHg. The control group showed no significant change in HR or BP. These findings suggest that a 12-week training program can effectively reduce HR and BP in sedentary, middle-aged men.
